

Zehrei Verj D. Morales

Full Stack Developer

Angeles City, Pampanga, Central Luzon
verj.morales@gmail.com | (+63) 960 417 7948
github.com/ZVDCM

Education

Angeles University Foundation | July 2018 - January 2023
Bachelor of Science in Information Technology (concentration: web and mobile development)

Skills

Languages	JavaScript, Typescript, PHP, C#, Python, SQL
Frontend	React, React Native, NextJS, Vue, NuxtJS, Angular, InertiaJS, Google Analytics, Google Tag Manager
Backend	NodeJS, NestJS, Strapi, Xano, Firebase, Supabase, Laravel, .NET
Database/Caching	MySQL, PostgreSQL, MongoDB, Firestore, MSSQL, Redis
Testing	Vitest, Jest, Cypress, Playwright, Puppeteer, Storybook
Cloud	Google Cloud Platform, Amazon Web Services
Services	SendGrid, Stripe, Xendit, DigitalOcean, Netlify, Vercel, Fly.io, Render, Heroku
DevOps	Cloudflare, Docker, Kubernetes, RabbitMQ, Jenkins

Projects

Utilized .NET, Angular, RabbitMQ, MSSQL, SendGrid, Docker, Kubernetes

Post It

- An assessment project on a microservices-based social media system utilizing .NET, Angular, RabbitMQ, and MSSQL. The project incorporates three software design principles: Microservices architecture, Domain-Driven Design (DDD), and Command Query Responsibility Segregation (CQRS).

Utilized NodeJS, React, Typescript, Apollo, RabbitMQ, Firestore, Docker, Kubernetes

Chit Chat

- An assessment project to showcase a microservices-based chat system, utilizing Node.js, React, Apollo, RabbitMQ, and Firestore.

Utilized Laravel, React, Typescript, Redis, MySQL, Docker, Kubernetes

Ask Here

- An assessment project to illustrate a microservices architecture for a question-and-answer web platform, integrating Laravel, React, Redis, and MySQL.

Utilized Python, PyQt5, Sockets, MySQL

Digital Classroom Management System

- The system enables class management with features like registration, attendance tracking, screen monitoring, messaging, alerts, display control, site blocking, and remote shutdown or lock of student PCs.

Utilized Python, Tkinter

Pathfinding Visualizer

- The desktop application features multiple algorithms for pathfinding visualization, including A* with Euclidean or Manhattan heuristics, Dijkstra's algorithm, and the breadth-first search algorithm.

Internship

Software Developer Intern

Angeles University Foundation

- Built a Health Monitoring Web App using Node.js, Chart.js, and JavaScript, featuring survey-based data collection, JWT authentication, role-based access, and email-based clinic scheduling.

Software Developer Intern

Hurey Pabacus

- Assisted in developing a web app with ASP.NET Zero and Angular, contributed to system design, client interviews, and implemented features like admission filtering and email-based enrollment verification.

Employment

Full Stack Developer

FullStack HQ | Feb 2024 – April 2025

1. **T2DS**

- A custom WordPress theme. created pages and ensured responsive design across devices.

2. **ProductBoard**

- A headless WordPress site using Next.js and Builder.io. Developed custom pages and components.

3. **HikeSEO**

- Led full-stack development of a Laravel + InertiaJS (Vue) application as part of a technical capabilities assessment.

4. **UNO (Internal Tool)**

- Integrated Clockify's API into a Laravel + InertiaJS (React) project to manage team schedules and client subscriptions.

5. **Raket.PH**

- A Next.js and Node.js e-commerce platform powered by Strapi. Led UI/UX design, integrated Google Analytics and Tag Manager, refactored backend systems, optimized API performance, and managed deployments on AWS and DigitalOcean with Cloudflare CDN configuration.

6. **WeCampaign**

- Led full-stack and mobile development for a Next.js + Xano site and React Native app. Integrated maps, authentication (IronSession), and deployed mobile builds via EAS.

7. **TruAlert (Mobile)**

- Assisted in debugging Google Maps integration in a React Native application.

8. **Native**

- Built and deployed a headless WordPress + Next.js site; led both frontend and backend development.

9. **Paxiv**

- Supported integration of AI chat history in a Next.js + Node.js platform.

10. **BlankSpaceGolf**

- Led full-stack development using Next.js and Node.js. Implemented JWT auth with rotating refresh tokens, RBAC, image scraping/detection, and deployed to multiple platforms (Netlify, Vercel, Render, Fly.io).
